Camp Activities :

Coding

**More than fun,
coding
builds brains!**

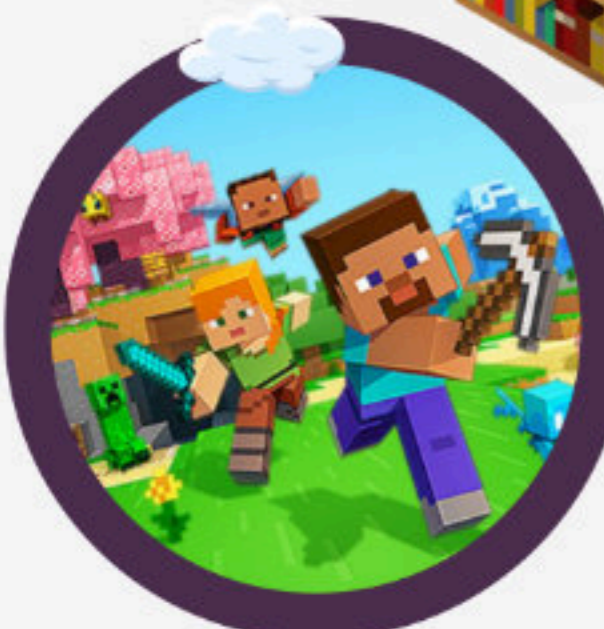

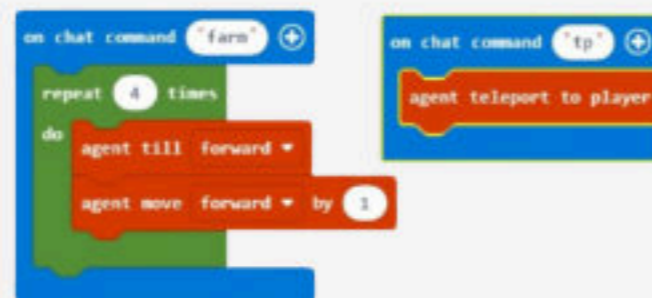

Our coding sessions go beyond just screen time. Children learn programming skills through fun, interactive projects, developing problem-solving, logic and creativity.

Workshops are taught by an **industry expert** working with studios such as Electronic Arts, Codemasters, BBC, Disney and Aardman Animation Studio.

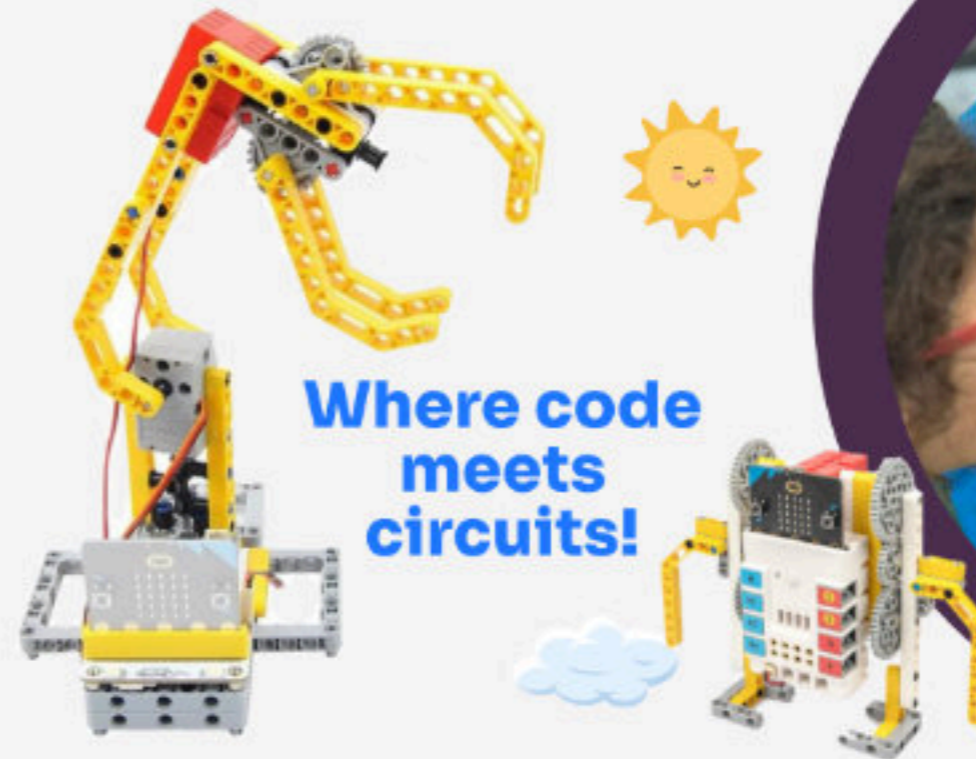

Children learn how to design and code their own 2D and 3D games using fun, kid-friendly tools. From side scrolling platform games to 3D worlds they can explore.

Using Minecraft Education Edition, children can explore, build, and code inside the world they already love! With coding tools, they'll automate builds, solve challenges and bring their creations to life!

Robotics

**Where code
meets
circuits!**

Children get hands-on with building real robots and programming them to move, make sounds and light up. It's an exciting way to learn teamwork, tech skills and logical thinking, all while having loads of fun!

Real Minecraft Den Building!

To maintain a healthy balance, our holiday club has plenty of off screen fun, collaborative play and hands-on building activities that spark new friendships.

Stop Motion Animation From Still to Stunning, make your own Movies!

In our stop motion animation classes, children become directors, animators and storytellers. Using LEGO, Plasticine or small toys, they'll create their own animated films, frame by frame!

BOOK A PLACE

A packed lunch is required.

INFORMATION

Help your child build future-ready digital skills in a fun and creative way.

At our Jam Coding Tech Camp your child will spend the week exploring coding, robotics, stop-motion animation and hands-on creative projects — balanced with plenty of off-screen games, teamwork and supervised play.

They'll learn new skills, build confidence and make new friends... all while having so much fun they'll hardly realise they're learning.

Scan the QR code to see the full program and secure your child's place. Spaces are limited.

£34.99 PER DAY or £155 for the full week.

To discover all of the details, view the schedule, and secure your child's place — simply scan the QR code!

Claim your 5% discount!

After scanning the QR code, complete our quick form to get your discount code instantly!

"I have never seen him so enthusiastic about a club before, so thank you for making it such a good day!" **Parent**

"My son has used Jam Coding for both after school club as well as a holiday club. He enjoys it so much that he opted to go to the club on his birthday rather than go for pizza!"

K Bull, Parent
