

COSHH POLICY

AIMS	LEGISLATION
<ul style="list-style-type: none"> Assess the risk of hazardous substances used in the school and the impact they may have on health. Implement appropriate control measures in order to manage identified risks. Regularly monitor and review control measures to ensure they are adequate. Regularly monitor the extent to which staff and pupils are exposed to hazardous substances and conduct health surveillance where necessary. Provide training for members of staff on the hazards, risks and precautions needed for effective control. 	<p>This policy has due regard to all relevant legislation and guidance including, but not limited to, the following:</p> <ul style="list-style-type: none"> The Health and Safety at Work etc. Act 1974 The Control of Substances Hazardous to Health Regulations 2002 (as amended 2004) HSE (2012) 'Working with substances hazardous to health'

The Control of Substances Hazardous to Health (COSHH) Regulations 2002 require employers to prevent their employees from being exposed to substances hazardous to health. Where exposure cannot be prevented, employers must ensure that the exposure is adequately controlled through risk assessments and appropriate control measures.

In accordance with the regulations, the school will ensure that all members of staff are aware of their roles and responsibilities for preventing ill health as a result of hazardous substances, and that adequate control measures are implemented and monitored at the school.

DEFINITIONS

For the purposes of this policy, a "hazardous substance" is any substance which may cause ill health if inhaled, ingested, injected, absorbed through the skin, or as a result of being released into the surrounding environment. Examples of hazardous substances which can cause ill health include:

- Substances used directly in activities, e.g. cleaning agents, adhesives and paints.
- Substances generated from activities, e.g. fumes.
- Naturally occurring substances, e.g. grain dust.
- Biological agents, e.g. bacteria and other micro-organisms.

For the purposes of this policy, "health surveillance" is a system of ongoing health checks for employees, conducted to help employers evaluate health risks and highlight concerns in workplace control measures. Health checks will be carried out for employees who are regularly exposed to hazardous substances such as solvents, fumes, and biological agents.

For the purposes of this policy, a "Material Safety Data Sheet (MSDS)" is a document which provides important health and safety information regarding a substance. The MSDS is provided by the supplier or manufacturer, and indicates whether a substance is classified as hazardous.

COSHH POLICY

COSHH PROCEDURES

- The school will recognise the procedures which need to be followed to ensure effective provision of COSHH, in line with regulations.
- Prior to using a hazardous substance, the Caretaker / School Office Manager will conduct a risk assessment, considering the possible hazards that may occur as a result of using the substance.
- The risk assessment will describe the control measures taken when using the substance, such as using appropriate PPE.
- Risk assessments will be produced in conjunction with the MSDS and consider any individuals who are likely to be affected by its use.
- The procedures and hazards identified in the risk assessment will be communicated to relevant members of staff, with copies of the risk assessment provided. Copies are also kept in the COSHH register for re-use, training and staff induction purposes.
- Risk assessments will also be carried out for exposure to biological agents, e.g. vomit and blood.
- All risk assessments are reviewed on a termly basis by the Head Teacher and any further necessary information is added.

CONTROL MEASURES

- The school will eliminate the use of any hazardous substances unless absolutely necessary.
- All pupils will be made aware of the safety procedures. Extra caution will be taken when using hazardous substances involved in teaching, e.g. in science lessons. When pupils use a hazardous substance, at least 2 members of staff will be present to supervise & handle potential emergencies.
- The Caretaker will aim to substitute hazardous substances for less hazardous alternatives, where these are available. Where substances cannot be eliminated or substituted for less hazardous alternatives, the amount of time for exposure will be minimised and the amount of the substance used will be reduced as much as possible.
- Where possible, substances will be used in isolation, away from other areas of the school, in order to prevent exposure to others. Appropriate ventilation, e.g. opening windows and external doors, will be used. Appropriate PPE will be worn by all those exposed to the substance.
- Hazardous substances will be stored safely and securely in the Caretaker's room. Substances will be locked away, out of sight and reach of pupils, with only appropriate members of staff having approved access. Only staff trained in COSHH will be given access to hazardous substances – pupils will not be permitted to access hazardous substances.
- After use, substances will be safely disposed of by staff trained in COSHH.
- The Caretaker / School Office Manager will ensure control measures are adequately monitored and maintained. Members of staff will report any defect in control measures immediately. All concerns regarding COSHH will be handled with the utmost importance and priority.
- Checks on control measures, and any actions taken to remedy faults, will be recorded in a logbook and kept for at least five years.

COSHH POLICY

HEALTH SURVEILLANCE

In accordance with COSHH regulations, the school will conduct health surveillance in the following instances:

- Where an individual is exposed to a substance which is associated with a disease or adverse health effect
- Where an individual is exposed to a substance which is likely to result in a disease or adverse health effect
- Where an individual displays signs of a disease or adverse health effect

Health surveillance will be conducted by the School Office Manager, who will obtain all the information on the individual's health and keep a written record of this. Records will be kept for a minimum of 40 years from the last entry. The individual concerned will be able to access their health records at any time they should request it.

All individuals at the school will be made aware that they have a responsibility to provide honest and true health information, and should declare any changes to their health that occur due to the exposure of a hazardous substance.

PLANNING FOR ACCIDENTS AND EMERGENCIES

- The school will aim to effectively manage every identified risk involved with the use of a hazardous substance; however, there may be instances when accidents, such as spillages, could occur and may be damaging to an individual's health.
- A detailed emergency plan will be established prior to the use of any substance by the Head Teacher as part of the risk assessment. The risk assessment undertaken for each hazardous substance will be kept with the related substance, so that members of staff are aware of the emergency procedures and first aid.
- Incidents will be responded to promptly and any harmful effects will be minimised where possible. Emergency services will be contacted immediately where the incident cannot be resolved by a trained member of staff. Only members of staff trained in COSHH and first aid will attempt to provide treatment to an individual, following the procedures outlined in the First Aid Policy.
- Emergency procedures will be practised regularly as part of a 'safety drill' method, to ensure that all individuals at the school are aware of the steps to follow.
- Accidents and emergencies will be reported to the Head Teacher immediately using the appropriate form.

TRAINING

The Caretaker and School Office Manager will conduct training for staff on a termly basis, ensuring that all staff are aware of:

- The names of the substances they work with and could be exposed to, as well as the associated risks and the use of MSDS.
- The appropriate precautions and control measures that they are expected to take to protect themselves, pupils and others at the school.
- The importance of PPE and how it should be used.
- The results of any exposure and health surveillance, whilst maintaining confidentiality and not revealing any identities.
- The correct measures to take when supervising pupils who are handling substances.
- The emergency procedures.

Training will be updated in response to any changes required to the provision of COSHH, e.g. additional information required on risk assessments or new PPE equipment, as well as in response to any incidents occurring at the school.

**COSHH POLICY****ROLES AND RESPONSIBILITIES**

Head Teacher	Caretaker / School Office Manager	Staff
<ul style="list-style-type: none"> Oversee day-to-day implementation of policy. <p>Ensure:</p> <ul style="list-style-type: none"> all staff are fully aware of their roles and responsibilities in relation to this policy, as well as the necessary control measures they are required to undertake. all staff receive effective COSHH training. where possible, the use of hazardous substances is avoided. risk assessments are completed where the use of hazardous substances cannot be avoided and effective control measures are in place. an up-to-date record is maintained of all hazardous substances used in the school, and that they are clearly labelled. 	<ul style="list-style-type: none"> Provide safe storage and disposal arrangements for hazardous substances. Purchase personal protective equipment (PPE) and ensuring that this is regularly reviewed, of an appropriate standard, and in line with the Health and Safety Policy. Conduct formal assessments of the health risks to all those at the school. Prevent and control the exposure of hazardous substances. Ensure proper use of control measures, e.g. PPE Ensure the controls used are necessary, safe and regularly reviewed. Conduct health surveillance for staff where necessary. Provide instruction, information and training on the use of hazardous substances, on a termly basis. 	<ul style="list-style-type: none"> Familiarise themselves with this policy. Where relevant to their role, use hazardous substances in accordance with the risk assessments conducted prior to use and the manufacturer's instructions, including the required control measures. Use PPE when necessary and reporting any damage to the site manager immediately. Attend COSHH training sessions if required. Ensure they are available for health surveillance where necessary. Report any health and safety concerns to the COSHH coordinator immediately. Communicate COSHH procedures and control measures to pupils where needed.
